political venture with great interest
and admired your readiness to take a
big risk to further your goal of social
change. Will you be so good to write
when it comes to public accounting
and controversy, it still must have
been difficult to weather all the strong
comments. Both Steve and I hope that
you were able to handle the interview
reports of the campaign and its after-
math with a healthy amount of
philosophical disengagement. You tried
to do something important in a bold
and daring way. And you must be
feeling some degree of optimism by the
change of political direction and strategy
of the new government - may vision folks!
Every good wish for the future, both short-
term & long range! 05/05/92. Steve & I

The international perspective has
brought word that this is a time of
transition and significant change for
you. I just heard that you have accept-
ed an offer to become Principal of the
Spata School in Jerusalem. I will stress
the world of education will be enriched
by your tenderness, creative energy, &
advice. I hope that the children
and teachers will respond to the bright
spirit of critical inquiry that you
bring and will allow themselves to
grow under your inspired guidance.
We will undoubtedly have many
stories to share and exchange!
We followed the accounts of you
